

Salt Deposition Eliminated and Compressor Run Time Increased Liquid Levels Controlled and Profit Increased \$19,000 per week!

BACKGROUND

A compressor located in Denton County, TX was failing due to salt build up on the gas valves and high liquid level. The producer called in the Multi-Chem team to provide a permanent solution that would alleviate the problem.

ISSUES

Because of solids in the fluids, the compressor was failing every three hours, requiring constant service. The producer worried about meeting monthly contracts.

ANALYSIS

Multi-Chem collected samples and reviewed wells on the lease to see what problems might be occurring. Based on the technical assessment, Multi-Chem selected two products; MC M-8120 to control the salt build ups and MC DF-7000 to control foam causing the high liquid level. Multi-Chem then installed a continuous application both products.

RESOLUTION

To comply with the producers request Multi-Chem continued applying M-8120 and DF-7000. After two months of usage, the compressor has not failed. The producer is very pleased with the results.

DELIVERED VALUE

Chemical Investment:
Chemical Program (M-8120 & DF-7000): \$548 / week
Investment Return (Profit Increase): \$19,000 /Week

Multi-Chem warrants to purchaser, but no third parties or others, the specifications for the product shall fall within a generally recognized range for typical physical properties established by Multi-Chem when the product departs Multi-Chem's point of origin and that any services shall only be performed in accordance with applicable written work documents.
