

MC MX 668-8 Reduces Cost to Scavenge H2S

Operator Saves \$120,000 / Year

BACKGROUND

Costs to treat the H2S on this well were steadily increasing. The incumbent supplier's product injection rates were slowly climbing, therefore costs were higher.

ISSUES

Primary issues were that the operator was using an H2S scavenger. The product worked, however, injection rates were creeping upward to produce sales quality gas.

ANALYSIS

The Multi-Chem team investigated the problem. Then, setting out to find an H2S Scavenger which required a lower injection rate, and subsequently a lower cost to the operator. MC MX 668-8 was identified as the best candidate product.

RESOLUTION

MC MX 668-8 treatments were started at a lower rate than the incumbent product. The application was successful and Multi-Chem was able to maintain high gas quality at reduced injection rates and lower costs.

DELIVERED VALUE

The operator was able to see the cost of the chemical program decrease by \$10,000 / month. MC MX 668-8 was much more cost effective than the previous H2S Scavenger.

Multi-Chem warrants to purchaser, but no third parties or others, the specifications for the product shall fall within a generally recognized range for typical physical properties established by Multi-Chem when the product departs Multi-Chem's point of origin and that any services shall only be performed in accordance with applicable written work documents.
